

Flexible. Reliable. Versatile.

Easy, Affordable Printing Solutions for Every Facility.

Carestream's complete line of DRYVIEW Laser Imagers delivers exceptional diagnostic image quality. Our innovative dry imaging technology uses laser light rather than heat to expose each pixel, which ensures more consistent film quality and minimizes service requirements. Automatic Image Quality Control (AIQC) technology automatically calibrates film and imager settings to meet specific user preferences.

Just select the DRYVIEW model ideal for your budget, space and throughput needs, and enjoy a new measure of diagnostic confidence – film after film, day after day.

Advantages At a Glance

- Flexible, high-quality laser imaging
- Intuitive user experience, minimal training
- Low total cost of ownership
- Full line of models to meet your workplace's requirements

Affordable Image Quality You Can Depend On.

We designed CARESTREAM DRYVIEW Laser Imagers for healthcare providers who refuse to compromise on the quality of care they provide – even when budgets are tight. These systems give you true DRYVIEW laser imaging quality at a low total cost of ownership.

Enhanced Patient Care

- Superb image quality
- Faster imaging, less waiting
- Less time printing means more time with patients

Radiology Staff Convenience

- Faster, smoother workflow
- No darkroom required – work in complete daylight

Excellent Flexibility

- Full range of multi-format capabilities
- Perfect for CR-to-Print applications
- CR software options to access patient databases
- Easy-load cartridges for simple film-size changes

The Right Model for Every Facility – Or Department.
